The Unified Modeling Language Reference Manual James Rumbaugh 2010 "If you are a serious user of UML, there is no other book quite like this one. I have been involved with the UML specification process for some time, but I still found myself learning things while reading through this book-especially on the changes and new capabilities that have come with UML." -Ed Seidewitz, Chief Architect, IntelliData Technologies Corporation The latest version of the Unified Modeling Language-UML 2.0-has increased its capabilities as the standard notation for modeling software-intensive systems. Like most standards documents, however, the official UML specification is difficult to read and navigate. In addition, UML 2.0 is far more complex than previous versions, making a thorough reference book more essential than ever. In this significantly updated and expanded edition of the definitive reference to the standard, James Rumbaugh, Ivar Jacobson, and Grady Booch-the UML's creators-clearly and completely describe UML concepts, including major revisions to sequence diagrams, activity models, state machines, components, internal structure of classes and components, and profiles. Whether you are capturing requirements, developing software architectures, designing implementations, or trying to understand existing systems, this is the book for you. Highlights include: Alphabetical dictionary of articles covering every UML concept Integrated summary of UML concepts by diagram type Two-color diagrams with extensive annotations in blue Thorough coverage of both semantics and notation, separated in each article for easy reference Further explanations of concepts whose meaning or purpose is obscure in the original specifications Discussion sections offering usage advice and additional insight into tricky concepts Notation summary, with references to individual articles An enhanced online index available on the book's web site allowing readers to quickly and easily search the entire text for specific topics The result is an indispensable resource for anyone who needs to understand the inner workings of the industry standard modeling language.

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Pub 1310 2001 The 2001 edition of Pub. 1310 Radar Navigation and Maneuvering Board Manual combines selected chapters from the sixth edition of Pub. 1310, Radar Navigation Manual, and the fourth edition of Pub. 217, Maneuvering Board Manual. This manual has been compiled by the editorial staff of the Maritime Safety Information Center at the National Imagery and Mapping Agency. It is intended to be used primarily as a manual of instruction in navigation schools and by naval and merchant marine personnel. By combining the previous editions of Pub. 1310 and Pub. 217 into one book we hope that we have provided a practical reference for mariners on board ship and instructors ashore. It is also intended to be of assistance to others who are concerned with marine radar in different and less direct ways. In combining the two manuals, every effort has been made to retain the original style and format which has proven to be clear and helpful to the maritime community. Most of the illustrations and examples have been carried forward into this edition. The chapter on ARPA has been expanded and now includes a sample operating manual for a modern commercial radar and ARPA. Many excellent other publications on ARPA are available and should be consulted for a more thorough understanding on this subject matter. Users should refer corrections, additions, and comments for improving this product to: MARITIME SAFETY INFORMATION CENTER NATIONAL IMAGERY AND MAPPING AGENCY ST D 444600 SANGAMORE ROAD BETHESDA MD 20816-5003

Cfpb Supervision and Examination Manual Consumer Financial Protection Bureau 2015-01-19 Part 2 of 2 Today we are releasing Version 2 of the CFPB Supervision and Examination Manual, the guide our examiners use in overseeing companies that provide consumer financial products and services. Our manual, originally released in October 2011, describes how the CFPB supervises and examines these providers and gives our examiners direction on how to determine if companies are complying with consumer financial protection laws. We updated the supervision manual to reflect the renumbering of the consumer financial protection regulations for which the CFPB is responsible. The numbering conventions in the Code of Federal Regulations (CFR) allow the reader to easily identify which regulations fall under a particular agency's responsibility. The renumbering incorporated throughout the manual reflects the Dodd-Frank Act of 2010 transfer of rulemaking responsibility for many consumer financial protection regulations from other Federal agencies to the CFPB. In December 2011, the CFPB published its renumbered regulations in the Federal Register. The renumbered regulations also included certain technical changes but no substantive changes. The CFPB's renumbering reflects the codification of its regulations in Title 12 (Banks and Banking), Chapter X (Bureau of Consumer Financial Protection) of the CFR. For example, before July 21, 2011, the Federal Reserve had rulemaking authority for the Home Mortgage Disclosure Act, which was codified in Title 12, Chapter II (Federal Reserve System), Part 203. The CFPB's implementing regulation for the Home Mortgage Disclosure Act is now codified in Title 12, Chapter X, Part 1003.
