"The Concept of the 'Master' in Art Education in Britain and Ireland, 1770 to the Present " MatthewC. Potter 2017-07-05 A novel investigation into art pedagogy and constructions of national identities in Britain and Ireland, this collection explores the student-master relationship in case studies ranging chronologically from 1770 to 2013, and geographically over the national art schools of England, Ireland, Scotland and Wales. Essays explore the manner in which the Old Masters were deployed in education; fuelled the individual creativity of art teachers and students; were used as a rhetorical tool for promoting cultural projects in the core and periphery of the British Isles; and united as well as divided opinions in response to changing expectations in discourse on art and education. Case studies examined in this book include the sophisticated tradition of 'academic' inquiry of establishment figures, like Joshua Reynolds and Frederic Leighton, as well as examples of radical reform undertaken by key individuals in the history of art education, such as Edward Poynter and William Coldstream. The role of 'Modern Masters' (like William Orpen, Augustus John, Gwen John and Jeff Wall) is also discussed along with the need for students and teachers to master the realm of art theory in their studio-based learning environments, and the ultimate pedagogical repercussions of postmodern assaults on the academic bastions of the Old Masters.

On the Road David W. Hewitt 2021-06-15 This book tells the story of a life spent on the road recording the rich diversity of music in America when it was a major part of our lives, not just digital background noise. For music fans, there was a golden era of live music, stretching from the 1960s through the 1980s, and even evolving into the 1990s, if you want to be generous. In the pre-digital era, music fans spent a large part of their free time (and money) listening to their favorite artist's recordings. It was an analog world so if they wanted to hear the music, they actually had to listen to the radio, buy the records, and go to the concerts. Popular artists had long performed live concerts in the major markets, but it took rock 'n' roll to make national touring a viable business. Touring sound systems grew from scratch to keep up with larger and larger venues. Likewise, the ability to record those shows had to grow as well. The rudimentary collection of semi-professional gear grew into full-blown remote recording studios to keep up with the demand for live records, films, and broadcasts. The truly wonderful thing about the remote recording business was the

author experienced so many different musical cultures. Where else could you go from recording a tour with the Rolling Stones to a TV special with Mohamed Ali at the Apollo Theater? How about the season opening of Carnegie Hall on PBS TV (with a different major orchestra every year) to Frank Zappa's annual Halloween Show? Or maybe a Yoko Ono tour behind the 1980s Iron Curtain to the Eagles in modern Australia? Then there are worldwide live broadcasts like the Academy Awards and the Grammy Awards to intimate jazz settings with Miles Davis or Wynton Marsalis. Compare the grandeur of the Metropolitan Opera to the irreverent comedy of Saturday Night Live. On the Road contains the stories of recording all that music live in its natural habitat, the clubs, theaters, concert halls, and arenas. There were only a few companies that succeeded in the rough and tumble business of live recording. The author was one of the most successful live recording engineers and the constructor of remote recording studios during that era, with thousands of live shows to his credit.

Early '70s Radio Kim Simpson 2011-07-21 Early '70s Radio focuses on the emergence of commercial music radio "formats," which refer to distinct musical genres aimed toward specific audiences. This formatting revolution took place in a period rife with heated politics, identity anxiety, large-scale disappointments and seemingly insoluble social problems. As industry professionals worked overtime to understand audiences and to generate formats, they also laid the groundwork for market segmentation. Audiences, meanwhile, approached these formats as safe havens wherein they could re-imagine and redefine key issues of identity. A fresh and accessible exercise in audience interpretation, Early '70s Radio is organized according to the era's five prominent formats and analyzes each of these in relation to their targeted demographics, including Top 40, "soft rock," album-oriented rock, soul and country. The book closes by making a case for the significance of early '70s formatting in light of commercial radio today.

Riding Man Mark Gardiner 2012-07-15 For 100 years, the Isle of Man Tourist Trophy races have been the world's most dangerous organized sporting event. As one of thirty thousand fans who attended the annual spectacle, Mark Gardiner harbored no illusions about his own skill or bravery. He was, however, an avid motorcyclist for whom the race represented a boyhood dream. He went home, quit his job, sold everything he owned, and returned to the Island to race there himself. Riding Man is the account of an Everyman, struggling to qualify for -- and survive -- the TT races. If you're a dreamer, the lesson in this book is that the pursuit of any worthwhile goal involves risks, rewards and, almost inevitably some regrets. If you're not a dreamer, the lesson is more important: the deepest regrets are always over risks not taken.

Marginalised Communities in Higher Education Neil Harrison 2021 "Drawing on examples from nine countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"--
