Index 1987 A multidisciplinary index covering the journal literature of the arts and humanities. It fully covers 1,144 of the world's leading arts and humanities journals, and it

indexes individually selected, relevant items from over 6,800 major science and social science journals.

Pipelines in the Constructed Environment American Society of Civil Engineers. Pipeline Division. Conference 1998 New

pipeline construction, the maintenance of existing pipelines, and the rehabilitation or replacement or deteriorating pipelines often takes place with many challenges and constraints imposed by developmental regulations. The 1998 Pipeline Division Conference provided a forum for those involved in the field to share ideas and learn more about the issues faced today. These 92 peer-reviewed papers reflect the current methods and technology in the field of pipeline construction. Proceedings of the 1998 Pipeline Division Conference, August '98, San Diego, CA.

Operational Amplifiers Johan
Huijsing 2016-07-09 This
proven textbook guides readers
to a thorough understanding of
the theory and design of
operational amplifiers
(OpAmps). The core of the
book presents systematically
the design of operational
amplifiers, classifying them into
a periodic system of nine main
overall configurations, ranging
from one gain stage up to four
or more stages. This division
enables circuit designers to

recognize quickly, understand,
and choose optimal
configurations. Characterization
of operational amplifiers is given
by macro models and error
matrices, together with
measurement techniques for
their parameters. Definitions are
given for four types of
operational amplifiers
depending on the grounding of
their input and output ports.
Many famous designs are
evaluated in depth, using a
carefully structured approach
enhanced by numerous figures.
In order to reinforce the
concepts introduced and
facilitate self-evaluation of
design skills, the author
includes problems with detailed

solutions, as well as simulation exercises.

The Archaeology of Power John

Steane 2001 A groundbreaking

study detailing what

archaeology can tell us about the middle-ages. The study of

government in Britain and

North-West Europe during the

middle ages has traditionally

been the monopoly of

historians. In this remarkable

book the author shows what

archaeology can contribute to

the overall picture of medieval

society. In particular he looks at

two areas: the objects, such as

costume, crowns, thrones and

sceptres which were vital

symbolic elements in complex

liturgical and ideological

systems and the buildings,

palaces, castles, monasteries

which were created by powerful

elites and provided the space

within which symbolic functions

were played out.

Water-resources Engineering

David A. Chin 2006 This in-

depth review of water-resources

engineering essentials focuses

on both fundamentals and

design applications. Emphasis

on fundamentals encourages

readers' understanding of basic

equations in water-resources

engineering and the background

that is necessary to develop

innovative solutions to complex

problems. Comprehensive

design applications illustrate the

practical application of the basic

equations of water-resources

engineering. Full coverage of

hydraulics, hydrology, and

water-resources planning and

management is provided.

Hydraulics is separated into

closed-conduit flow and open-

channel flow, and hydrology is

separated into surface-water

hydrology and ground-water

hydrology. For professionals

Diseases of Swine Jeffrey J.

Zimmerman 2019-03-25

Provides a fully revised

Eleventh Edition of the definitive

reference to swine health and

disease Diseases of Swine has

been the definitive reference on swine health and disease for over 60 years. This new edition has been completely revised to include the latest information, developments, and research in the field. Now with full color images throughout, this comprehensive and authoritative resource has been redesigned for improved consistency and readability, with a reorganized format for more intuitive access to information. Diseases of Swine covers a wide range of essential topics on swine production, health, and management, with contributions from more than 100 of the foremost international experts in the field.

This revised edition makes the information easy to find and includes expanded information on welfare and behavior. A key reference for anyone involved in the swine industry, Diseases of Swine, Eleventh Edition: Presents a thorough revision to the gold-standard reference on pig health and disease Features full color images throughout the book Includes information on the most current advances in the field Provides comprehensive information on swine welfare and behavior Offers a reorganized format to make the information more accessible Written for veterinarians, academicians, students, and individuals and

agencies responsible for swine health and public health, Diseases of Swine, Eleventh Edition is an essential guide to swine health.

Sentinel Lymph Node Biopsy

Hiram S. Cody 2001-11-08 An intuitive, ingenious and powerful technique, sentinel lymph node biopsy has entered clinical practice with astonishing rapidity and now represents a new standard of care for melanoma and breast cancer patients, while showing great promise for the treatment of urologic, colorectal, gynecologic, and head and neck cancers. This text, written by international experts in the technique, provides a clear and

comprehensive guide, presenting a detailed overview and discussing the various mapping techniques available and how these are applied in a number of leading institutions.

This essential resource for surgical onocologists, pathologists, and specialists in nuclear medicine will also provide key information for those planning to start a sentinel lymph node program.

A History of Optical Telescopes in Astronomy Wilson Wall

2018-10-01 This book is uniquely about the relationship between the optical telescope and astronomy as they developed together. It covers the time between the telescope's pivotal invention in the 1600's up to the modern era of space-based telescopes. Over the intervening centuries,

there were huge improvements in the optical resolution of telescopes, along with changes in their positioning and nature of application that forever altered the course of astronomy. For a long time, the field was an exclusive club for self-motivated stargazers who could afford to build their own telescopes.

Many of these leisure-time scholars left their mark by virtue of their meticulous observations and record keeping. Although they would now be considered amateurs, these figures and their contributions were pivotal and are covered in this book alongside professionals, for the first time giving a complete picture of the history of

telescopic science.

Digital Cinematography David Stump, ASC 2021-11-19

Today's successful cinematographer must be equal parts artist, technician, and business-person. The cinematographer needs to master the arts of lighting, composition, framing and other aesthetic considerations, as well as the technology of digital cameras, recorders, and workflows, and must know how to choose the right tools (within their budget) to get the job

done. David Stump's *Digital Cinematography* focuses on the tools and technology of the trade, looking at how digital cameras work, the ramifications of choosing one camera versus another, and how those choices help creative cinematographers to tell a story. This book empowers the reader to correctly choose the appropriate camera and workflow for their project from today's incredibly varied options, as well as understand the ins and outs of implementing those options. Veteran ASC cinematographer David Stump has updated this edition with the latest technology for cameras, lenses, and recorders, as well as

included a new section on future cinematographic trends. Ideal for advanced cinematography students as well as working professionals looking for a resource to stay on top of the latest trends, this book is a must read.

SEER Summary Staging Manual 2000 National Cancer Institute (U.S.). Cancer Statistics Branch 2001-10 From the Surveill., Epidem., & End Results (SEER) Prog. based at the Nat. Cancer Inst. Intended as a coding manual beginning with cases diagnosed from Jan. 1, 2001 rather than a staging guide. Each anatomic site in the Topography Sect. of the Internat. Class. of Disease for

Oncology -- 3rd Ed. (ICD-0-3) has a corresponding summary staging scheme. Certain specific histologic types also have specific staging schemes. In some cases, sites which previously had separate guides (such as the segments of the colon) have a single staging scheme (colon), whereas some sites which previously had a single guide (e.g., larynx) have separate schemes for each sub-site of the larynx.
