When  $D=1$ , an order 3 tensor reduces to a matrix. We have interacted with tensors day-to-day. A scalar value is a zeroth-order (order 0) tensor; a vector is an order 1 tensor; and a matrix is a second order tensor. A color image is in fact an order 3 tensor. An image with  $H$  rows and  $W$  columns is a tensor with size  $H \times W \times 3$ : if a color image is ...
