Nursing Home Administration, 6th Edition + the Licensing Exam Review Guide in Nursing Home Administration, 6th Edition Springer Verlag 2011-02

Making the Golden Years Golden Eva Mor 2008-07-01 I was born in the state of

Maine, but my parents brought me to Indiana when I was very small. I have lived in Southeastern Indiana most all my life. My husband is a Vietnam veteran. I married young and I am still married to the same man. I have two children and two grandchildren. The writing bug bit me many years ago and for almost three years I wrote and distributed a newsletter, which consisted of biblical teaching, inspirational segments and short stories. I have spent endless hours sitting in front of the computer applying the story telling to the screen in front of me and then sending it on to numerous people hungry for an opportunity to escape, if only for a short time, into a world of imagination. The teaching area of my letters and the inspirations were a means of getting God's message out to those who cared to listen. Hence, the title of my book. "The Master's Message." We have all been told from time to time that we are incapable of accomplishing our dreams. Why is it that we buy into all that negativity? I am an ordinary human being, with an ordinary background, in an ordinary life and I have proven that anything is possible if you just step out and have faith. We all have God given gifts and talents and if it is our desire then it is God's desire also, providing it is used to be a blessing to someone. I hope that this book blesses you. The one who is reading this now is hopefully one of many, but nevertheless, if only one is touched, then my job is done.

Part financial memoir and part research-based guide to attaining lifelong security, *This Is the Year I Put My Financial Life in Order* is the book that everyone who has never wanted to read a preachy financial guide has been waiting for. John Schwartz and his wife, Jeanne, are pre-retirement workers of an economic class well above the poverty line, but well below the one percent. Sharing his own alternately harrowing and hilarious stories—from his brush with financial ruin and bankruptcy in his thirties to his short-lived budgeted diet of cafeteria french fries and gravy—John will walk you through his own journey to financial literacy, which he admittedly started a bit late. He covers everything from investments to retirement and insurance to wills (at fifty-eight, he didn't have one!), medical directives and more. Whether you're a college grad wanting to start out on the right foot or you're approaching retirement age and still wondering what a 401(K) is, *This Is the Year I Put My Financial Life in Order* will help you become your own best financial adviser.

Nursing Homes and Assisted Living Peter S. Silin 2009-11-16 Almost a decade ago, Peter S. Silin wrote *Nursing Homes: The Family's Journey* to provide family members with practical advice and emotional support. This successor volume incorporates the new and sometimes baffling world of assisted living. *Nursing Homes and Assisted Living* focuses on the psychological, emotional, and practical aspects of helping family members and seniors make a difficult transition. Silin approaches his subject with compassion and sensitivity, guiding readers through the process of finding the best possible care. He describes how nursing homes and assisted living facilities work and outlines the selection process; he explains how to prepare for the day a relative moves into a facility and suggests ways to help the resident settle in; he focuses on the family member's role in solving problems, obtaining good-quality care, and visiting. The author's insights help caregivers cope with difficult decisions and deal with emotional issues such as guilt and grief, while celebrating the tender, rewarding aspects of being a caregiver. Vignettes from real-life caregivers narrating their experiences amplify Silin's advice and will resonate with families. This book provides caregivers, family members, and seniors with the information they need to effect successful transitions. It is also a valuable tool for social workers, nurses, and family therapists.

You and Your Aging Parent Barbara Silverstone 2008-02-27 First published in 1976, *You and Your Aging Parent* is a classic--the first book to shed light on the challenging relationship between adult children and their aging parents, illuminating the emotional, health, and financial difficulties that elderly parents and their children face during the senior years. Marking the 30th anniversary of this highly popular book, the new and revised edition addresses the changes that have taken place in the last three decades, but it still embraces the authors' fundamental insight--that the difficulties and challenges of the aging process are as much a family affair as in any other phase of life. Both a sensitive exploration of the dynamics of the aging family relationship (between parent and child, and sibling and sibling) and an authoritative how-to guide for seniors and their families navigating the practical problems of growing old in America, *You and Your Aging Parent* has been thoroughly updated to reflect the latest research findings and changes affecting older adults, including in health care and social services. The book also includes a running commentary by Bob Morris--playwright, author, and humorist--who provides insightful and entertaining observations about his trials and tribulations with his own parents as they aged, serving as a contemporary voice for the middle-aged caregiver of today. As the first of the baby boom generation turns 60 and their increasingly frail parents approach late retirement and final decline, this new and updated edition of *You and Your Aging Parent* will answer their need for authoritative, practical information about this major phase of life.

When the Time Comes Paula Span 2009-06-10 What will you do when you get the call that a loved one has had a heart attack or a stroke? Or when you realize that a family member is too frail to live alone, but too healthy for a nursing home? Journalist Paula Span shares the resonant narratives of several families who faced

these questions. Each family contemplates the alternatives in elder care (from assisted living to multigenerational living to home care, nursing care, and at the end, hospice care) and chooses the right path for its needs. Span writes about the families' emotional challenges, their practical discoveries, and the good news that some of them find a situation that has worked for them and their loved ones. And many find joy in the duty of caring for an older loved one. There are 45 million Americans caring for family members currently, and as the 77 million boomers continue to age, this number will only go up. Paula Span's stories are revealing and informative. They give a sense of all the emotional and practical factors that go into the major decisions about caregiving, so that readers will be better able to figure out what to do when the time comes for them and their loved ones.
